

NIH teams up with the lancet and leading international organizations to address public health impacts of climate change: New strategies promote health and reduce greenhouse gas emissions

Author(s): National Institute of Environmental Health Sciences (NIEHS)

Source: https://www.niehs.nih.gov/news/newsroom/releases/2009/november25/index.cfm

Resource Description

Exposure:

weather or climate related pathway by which climate change affects health

Unspecified Exposure

Geographic Feature: M

resource focuses on specific type of geography

None or Unspecified

Geographic Location: M

resource focuses on specific location

United States

Health Co-Benefit/Co-Harm (Adaption/Mitigation): ☐

specification of beneficial or harmful impacts to health resulting from efforts to reduce or cope with greenhouse gases

A focus of content

Health Impact: M

specification of health effect or disease related to climate change exposure

General Health Impact

mitigation or adaptation strategy is a focus of resource

Mitigation

Resource Type: M

format or standard characteristic of resource

Climate Change and Human Health Literature Portal

Research Article

Resilience: M

capacity of an individual, community, or institution to dynamically and effectively respond or adapt to shifting climate impact circumstances while continuing to function

A focus of content

Timescale: M

time period studied

Time Scale Unspecified
